

KEY STAGE 3 COMPUTING – MAPPING TABLE

	Spreadsheets	Databases	Microbits	Game Making with Kodu	What is a computer?	Advanced Scratch	Digital Imaging	Web Awareness	Grand Designs	Computational Thinking	Algorithms & Boolean Logic	Python Magic
Design, use and evaluate computational abstractions that model the state and behaviour of real-world problems and physical systems												
Understand several key algorithms that reflect computational thinking [for example, ones for sorting and searching]; use logical reasoning to compare the utility of alternative algorithms for the same problem												
Use two or more programming languages, at least one of which is textual, to solve a variety of computational problems; make appropriate use of data structures [for example, lists, tables or arrays]; design and develop modular programs that use procedures or functions												
Understand simple Boolean logic [for example, AND, OR and NOT] and some of its uses in circuits and programming; understand how numbers can be represented in binary, and be able to carry out simple operations on binary numbers [for example, binary addition, and conversion between binary and decimal]												
Understand the hardware and software components that make up computer systems, and how they communicate with one another and with other systems												
Understand how instructions are stored and executed within a computer system; understand how data of various types (including text, sounds and pictures) can be represented and manipulated digitally, in the form of binary digits												
Undertake creative projects that involve selecting, using, and combining multiple applications, preferably across a range of devices, to achieve challenging goals, including collecting and analysing data and meeting the needs of known users												
Create, re-use, revise and re-purpose digital artefacts for a given audience, with attention to trustworthiness, design and usability												
Understand a range of ways to use technology safely, respectfully, responsibly and securely, including protecting their online identity and privacy; recognise inappropriate content, contact and conduct and know how to report concerns.
